

## COVID-19 Admissions Policy Amendments

Due to COVID-19 precautions and closures, Trevecca's PA Program has made the following adjustments to its admission policies for the 2025-2026 CASPA cycle:

1. According to our long-standing admissions policy, all science pre-requisites were required to be taken in an in-person setting before spring 2020. Due to educational adjustments necessary, online or hybrid science pre-requisite courses taken during spring, summer or fall of 2020 and spring and summer of 2021 will be accepted under our COVID-19 policy. At the time of application, please list all science courses which you were **required (due to COVID)** to take in an online/hybrid setting during the timeframe above.
2. As of fall 2021, we require all science pre-requisite courses being taken in-person. We understand some areas of the country and the world continued to have limited access to in-person educational opportunities, due to COVID, after fall 2021. If you had a COVID-related reason for being required to take a science pre-requisite course in an online or hybrid format beginning fall of 2021 or beyond, please reach out to us. We will review individual situations for approval. Please request an exemption form to be completed will be your next step.
3. Although we strongly advised prospective students not to utilize the option of pass/fail or satisfactory/unsatisfactory during COVID, we realize some applicants may have done so. All situations will be reviewed individually.

The last day to **submit and complete** an application with **all** requirements fulfilled is October 1, 2025 at 11:59 pm EST. You are allowed to have courses pending when you apply. Please review our website for all requirements and deadlines. No application submission of any type will be accepted after the above date. If you have further questions, please contact one of our admissions team members. We look forward to working with you during the application and admissions process!
